

1

A background image showing a herd of cattle, with a semi-transparent overlay containing text. The text is organized into a title and a list of disease-related updates.

**DISEASE
SITUATION –
KAZA
LANDSCAPE**

- Rabies – Hyaena ,Kariba 5000 domestic dogs were vaccinated
- Anthrax –Lion Hwange Nat Park
- FMD –Dete ,7000 cattle were vaccinated, buffalo strayed into kraal
- FMD – SATI,2,3 no type O
- Taxon 45 Pasteurella ,in elephants monitoring still on going

2

3

SURVEILLANCE

Tb – collaring and monitoring of lion prides , funding for active sampling of lion prides for TB presence

Tb – buffalos – funding for monitoring buffalo heads

Sero prevalence of livestock for FMD around Hwange national park

Collaring and camera traps + FMD Anti bodies in fecal samples for FMD in buffalo , kudu –disease risky analysis in communities around Hwange national park

4

CHALLENGES

- Training of first respondents –sample collection ,postmortem ,crime scene management
- Passive surveillance
- Funding –sample collection(vehicles and consumables) ,
- transportation (manpower and capacitation)
- PPR surveillance - Blood collected –buffalo-40 ,and impala-10,sheep and goat -1200
